Our mission:

to serve, to heal,
to educate.
Thank you for your interest in the Female Pelvic Medicine and Reconstructive Surgery (FPMRS) Fellowship Program at Cooper University Health Care. Our program is three years in length and accepts one fellow per year. The FPMRS fellowship functions as an integral component of the Obstetrics and Gynecology Residency Program and both programs are currently accredited by the ACGME.

Female Pelvic Medicine and Reconstructive Surgery is one of five divisions within the Department of Obstetrics and Gynecology. The Department of Obstetrics and Gynecology at Cooper University Hospital (CUH) employs 34 full-time faculty members committed to delivering the finest patient care and providing the best education for the next generation of physicians. The program consists of three years of broad-based training in urogynecology with access to innovative research and dynamic clinical training in an academic environment. The FPMRS program has an active conference schedule with monthly clinical conferences and Journal Club, in addition to organized didactic conferences offered on a biweekly basis. First—and second-year rotations consist of FPMRS, urology, colorectal, and two weeks of plastic surgery. The third year typically consists of a more focused experience on these services with the opportunity for external electives if there is interest. Fellows participate in regular continuity clinic sessions at The Jaffe Family Women’s Care Center at Cooper, following their own panel of patients throughout the three years of training.

The Female Pelvic Medicine and Reconstructive Surgery Fellowship Program at Cooper University Health Care places special emphasis on the importance of comprehensive education and developing collegial relationships between faculty and fellows. FPMRS faculty hold academic appointments at Cooper Medical School of Rowan University (CMSRU) and are actively involved in medical-student educational programs at the medical school. There is a high faculty-to-fellow ratio with three core and six non-core employed faculty involved in the education of three FPMRS fellows. The program offers access to faculty with expertise in a variety of specialties as they pertain to the field of FPMRS, including vaginal; abdominal and endoscopic reconstructive surgery; pelvic floor anatomy; genitourinary and rectovaginal fistula repair; urodynamics and cystoscopy; multiple treatment modalities for urinary incontinence; integrative medicine in urogynecology, and urologic, colorectal, and plastics procedures.

The following pages provide specific information about FPMRS fellowship training at Cooper. We invite you to take the time to explore our program.
Cooper University Health Care, the clinical campus of Cooper Medical School of Rowan University, is the leading tertiary-level provider serving the southern New Jersey region. Cooper has been an anchor institution in Camden for over 130 years, offering training programs for medical students, residents, fellows, nurses, and allied health professionals in a variety of specialties. The Cooper network currently serves more than a half million patients per year.

Cooper University Health Care has more than 800 physicians in over 75 specialties. Cooper offers a network of comprehensive services that includes prevention and wellness, primary and specialty physician services, hospital care, and ambulatory diagnostic and treatment services within southern New Jersey and the entire Delaware Valley.

The teaching faculty of the medical school, Cooper University Physicians, maintains more than 100 offices at 38 locations throughout southern New Jersey. Cooper’s physicians are frequently recognized as “Top Doctors” in their field. These world-class physicians are the teachers with whom you will interact with throughout your educational curriculum. Cooper physicians are involved in ongoing research and development as they keep abreast of the ever-changing landscape of medical care.

Cooper’s department of Obstetrics and Gynecology at Cooper University Health Care offers women a full range of advanced medical programs and services through all stages of life. All OB/GYN sub-specialists are board-certified and fellowship-trained, offering expert treatment options in many areas from the management of pregnancy and delivery, maternal fetal medicine, gynecologic oncology, treatment of disorders of the reproductive system, to pelvic and sexual health. Cooper is distinguished as a state-designated Regional Perinatal Center, serving the region’s highest-risk patients in need of the most serious care.
Introduction

Cooper’s division of Female Pelvic Medicine & Reconstructive Surgery was established in the late 1990s and accredited in 2000 when the first fellow was accepted. The division has more than 5,000 patient visits and 400 surgeries per year. The division has trained fellows that have gone on to practice in many universities around the country.

The FPMRS team works closely with the divisions of Urology, Colorectal Surgery, Plastic Surgery, and Physical Therapy to provide patients with access to comprehensive care that best meets their needs. Although Cooper University Hospital is the core teaching facility where patients are seen and surgeries are performed, urogynecologic care is provided at many of the surrounding community hospitals from central to southern New Jersey. Their two offices are located in Voorhees and Hamilton, in addition to a third, fellow-run office in Camden where patients receive the most up-to-date diagnostic and treatment modalities available.

Our division’s faculty is nationally recognized for their skills in vaginal reconstructive surgery and are considered key opinion leaders in FPMRS. They are all founders of international mission organizations that provide much needed care to women around the world. Former fellows have had the opportunity to provide mission work around the world, adding to the unique opportunities that continue to enhance our program.

“Urogyn fellowship at Cooper was the best time in my training years. Attendings put an emphasis on education, not service. You are exposed to various approaches of different surgeries. The variety and volume of surgeries is unmatched by any other fellowship program. However, that is not all you learn. Most importantly, they will show you how much you should care about patients.”

... 

Sang Ho Rhee, MD
2014
Attending Urogynecologist
MidAtlantic Urology Associates, LLC
Greenbelt, Maryland
About the Faculty

Cooper University Health Care Faculty:

Adam Holzberg, DO, FACOG, FPMRS, Division Head and Program Director
Dr. Holzberg is an Associate Professor and serves as the Division Head and Program Director for FPMRS. He received his medical degree from New York College of Osteopathic Medicine and his OB/GYN residency and FPMRS fellowship at Cooper University Hospital. He received his subspecialty certification in FPMRS from the ABOG in the original class of 2013. His area of interest is graft use in vaginal reconstructive surgery where he is widely published. He is a founding member of the Mesh Special Interest Group and founding Chair of the EMR Special Interest Group for the American Urogynecologic Society. He serves as the Cooper principal investigator for an FDA required and industry sponsored research project on the Uphold lite synthetic mesh kit. Dr. Holzberg also serves as Cooper University Health Care’s Medical Director of the Ambulatory Clinical Documentation Improvement Program and is the Physician Champion/Chair for Physician Engagement. Dr. Holzberg also has a special interest in international medicine. He serves as the Secretary and is a founding board member for International Healthcare Volunteers. He has participated in multiple medical missions to Ghana, West Africa.

Joseph M. Montella, MD, MS, CPE, FACOG, FPMRS
Joseph M. Montella, MD, MS, CPE is currently the Vice President of Medical Affairs at Cooper University Healthcare. He received his medical degree from Jefferson Medical College then completed a residency in Ob-Gyn at Jefferson University Hospital and a fellowship in Female Pelvic Medicine and Reconstructive Surgery at the University of California, Irvine. He earned a Master of Science degree in Healthcare Quality and Safety from the Jefferson College of Population Health and is a Certified Physician Executive through the Certifying Commission of Medical Management. He is also a TeamSTEPPS Master Trainer in patient safety. Dr. Montella is Board Certified in Female Pelvic Medicine and Reconstructive Surgery and has practiced this specialty for over 26 years. He was former Chair of the Department of Ob-Gyn at Jefferson Medical College, served as President of the American Urogynecologic Society, and has participated in NIH study sections and grant reviews for the Pelvic Floor Disorders Network. He has presented his scientific work at TeamSTEPPS National Conferences and AUGS Annual Scientific Meetings and has published his research in the American Journal of Medical Quality, Obstetrics and Gynecology, and The Journal of Female Pelvic Medicine and Surgery.

Dr. Montella is the executive physician lead on the Quality and Patient Safety Pillar for the organization and has designed a method for incentivizing physicians for meeting quality metrics. He has played an integral role in helping physician leadership craft individualized quality measures for their groups that align with organization goals in order to improve value while maximizing reimbursement and reducing cost.

Michael DiSanto, PhD
Dr. DiSanto is an Associate Professor of Surgery and Biomedical Sciences and the Director of Urology Research. He received his Bachelors Degree in Biochemistry

“Exceptional surgical diversity is the hallmark of Cooper’s Urogynecology Fellowship Program. A curriculum of vaginal, abdominal and robotic training will ensure you have all the tools and techniques necessary to become a complete pelvic surgeon.”

Benjamin Steinberg, DO 2011
Assistant Clinical Professor, University of California
San Francisco-Fresno Female Pelvic Medicine and Reconstructive Surgery, Urology Associates of Central California

• • •
from Albright College and his PhD from Drexel University in Biochemistry and Molecular Biology. A prolific researcher, he has been awarded multiple federal grants. He is part of our research team and serves as the mentor to our basic science projects.

**Martha Mathews, MD, FACS**
Dr. Mathews is an Associate Professor of Surgery, Head of the Division of Plastic Surgery and program director for the plastic surgery residency program. She is a graduate of Jefferson Medical College and completed her residency in plastic Surgery at Eastern Virginia Graduate School of Medicine. She serves as the FPMRS fellowship clerkship director for the fellows’ plastic surgery rotation.

**Saifuddin T. Mama MD, MPH, FACOG, FPMRS**
Dr. Saifuddin T. Mama MD, MPH is Associate Professor and Head, Section of Minimally Invasive Gynecology and Robotics at Cooper University Hospital. A graduate of Yale University with a Master of Public Health degree, Dr. Mama completed his medical degree at Thomas Jefferson College and his Ob/Gyn residency at the Hospital of the University of Pennsylvania. He has received numerous teaching awards. Dr. Mama’s specialties include pediatric and adolescent gynecology, pelvic reconstructive surgery, and minimally invasive gynecologic surgery. Dr. Mama has ten years of experience in multiple medical missions volunteering abroad in Africa and Asia as a teaching attending and surgeon.

**Peter Chen, MD, FACOG**
Dr. Chen is currently an Assistant Professor of CMSRU and Director of the Women’s Care Clinic of Cooper University Hospital. He completed his medical degree at Hahnemann University School of Medicine in 1996, and his residency training in Obstetrics and Gynecology in 2000. Coming to us from the Hospital of the University of Pennsylvania, where he was faculty from 2000-2011, he continues to actively participate in Ob/Gyn medical student, resident and FPMRS fellow teaching. He has co-authored a variety of articles, abstracts and book chapters and has received numerous teaching awards including the “John J. Mikuta, MD Award for Excellence in Professionalism in Women’s Health” by the Perelman School of Medicine, University of Pennsylvania, in June, 2011, the Council on the CREOG National Faculty Award for Excellence in Resident Education,” in June, 2012 at Cooper and South Jersey Magazine’s Top Doc in 2013. He specializes in robotic gynecologic surgery and significantly contributes to the fellows’ robotic training.

**Robert P Siefring, MD, FACOG**
Dr. Siefring is Assistant Professor of OB/GYN and Medical Director of the Center for Vulvovaginal Disease at Cooper Hospital. He is a graduate of the University of Guadalajara and completed his OB/GYN residency at Cooper Hospital. He has received multiple teaching awards and has been selected as a “Top Doc” in South Jersey Magazine. The fellows gain most of their experience in vulvar diseases with Dr. Siefring during his monthly vulvovaginitis clinic.
Gunda Simpkins, MSN, MPH
Gunda Simpkins is Coordinator of clinical research for the Ob/Gyn department and has over 20 years of experience in Perinatal and Women's Health nursing. She was educated at the University of Delaware (BSN, Sigma Theta Tau) and Villanova University (MSN) and has recently earned a Master's degree in Public Health from UMDNJ-Stratford (Delta Omega). She participates in coordinating all aspects of FPMRS research including our sponsored research.

Krystal Hunter, MBA
Krystal Hunter serves as the lead statistician for the Cooper Research Institute. She received her BA in Economics from Spelman College in Atlanta, GA and her MBA from Rutgers University Graduate School of Management, New Brunswick, NJ. She is an integral part of the FPMRS research committee and contributes to all research projects from their inception to publication. She also actively participates in all Journal Clubs for the division. She has authored numerous peer-reviewed papers and instructs the fellows and faculty in statistical analysis.

To enhance the education of our fellows and increase their surgical skills we have collaborated with Thomas Jefferson University Hospital and are sending our fellows for external rotations:

Thomas Jefferson University Faculty:

Karolynn Echols, MD, FACOG, FPMRS
Dr. Echols is Associate Professor of Ob/Gyn at Thomas Jefferson University Hospital. She received her medical degree from Temple University School of Medicine and completed her OB/GYN residency at the University of Miami/Jackson Memorial Hospital. Dr. Echols received her FPMRS fellowship training from Louisiana State University Health Sciences Center in New Orleans. She also received her ABOG board certification in FPMRS as part of the first class of senior applicants in 2013. She is most interested in the diagnosis and management of genital fistulas, and the use of endoscopy and integrative/alternative medicine in FPMRS. She is a founding member of the Global Medicine Special Interest Group for the American Urogynecologic Society. Dr. Echols has been chosen to be a principal investigator for the FDA-required and industry sponsored research project on the Restorelle graft versus native tissue repair utilization in pelvic reconstructive surgery. She has received numerous teaching awards and has been frequently awarded “Top Doc” in SJ and South Jersey Magazine.

Dr. Echols has vast experience doing mission work in Camereroon, Niger, Kenya, Rwanda and Jamaica. She is currently the president and co-founder of Medicine In Action and on the medical board of advisors for the International Organization of Women and Development. She is also an honorary consultant for the University of West Indies in Kingston, Jamaica where she teaches annually.
Alana Murphy, MD, FPMRS
Dr. Murphy is an Assistant Professor of Urology/Female Urology at Thomas Jefferson University Hospital. She completed her training in female pelvic medicine and reconstructive surgery at Cleveland Clinic. She is currently as assistant professor of urology at Thomas Jefferson University in Philadelphia, PA. As the director of female urology and voiding dysfunction, she is involved in resident education, fellow training and clinical research.

Benjamin Phillips, MD, FACS
Dr. Phillips is an Assistant Professor in Colorectal Surgery with a very active academic practice at Thomas Jefferson University Hospital. He completed medical school in 1999 from the University of Medicine and Dentistry of New Jersey in Newark, NJ (Now Rutgers University Medical School). He completed his general surgery residency from The University of Tennessee Medical Center in Knoxville, Tennessee in 2005. He has also completed one-year research fellowship at Harvard Medical School in 2001 and a one-year ACGME-accredited fellowship in Colon and Rectal Surgery at Thomas Jefferson University Hospital in 2009.

Dr. Phillips spent three years in private practice as a general surgeon in Waynesville, NC. He worked as an Assistant Professor of surgery as a Colorectal and General surgeon at Cooper University Hospital for three years. Currently, he is an Academic Colorectal surgeon at Thomas Jefferson University Hospital where he also serves as the assistant program director of the colorectal surgery fellowship.

Dr. Phillips is engaged in surgical education at the Undergraduate and Graduate Medical Education levels. He is board certified in both general surgery and colorectal surgery. The focus of his practice is benign and malignant anorectal and colorectal disease. He performs endoscopy, robotic, laparoscopic, and open surgeries regularly and is actively engaged in research within the field of colorectal surgery.

Stephanie McConnell Moleski, MD
Dr. Moleski is an Assistant Professor of Medicine and Associate Program Director in the Division of Gastroenterology at Thomas Jefferson University Hospital. She received her undergraduate degree from Duke University and graduated from Jefferson Medical College. She completed residency in Internal Medicine where she was Chief Medical Resident and then fellowship in Gastroenterology all at Thomas Jefferson University Hospital. She has remained on staff at Jefferson where she is a clinician, teacher and researcher.

She has a special interest in women's gastrointestinal health including pelvic floor dysfunction, irritable bowel disease and celiac disease.
Our fellowship is designed to provide fellows with comprehensive education and training in a variety of specialties in urology, colorectal surgery, plastic surgery, and research. Fellows are also given the opportunity to explore additional interests in the FPMRS field during their clinical elective rotation in the third year. The educational curriculum has been designed to meet the objectives set forth in the proposed ACGME program requirements for residency education in FPMRS. There is a didactic conference schedule covering all aspects of FPMRS, in addition to quarterly lectures on atypical topics encountered in FPMRS. The fellow is expected to refer to this curriculum to direct their learning activities and identify areas of weakness or lack of experience. We strongly encourage fellows to bring any concerns to the attention of the program director in order to personalize their curriculum to strengthen those areas. An example of the educational monthly schedule is shown below.

Research

During the FPMRS fellowship, the fellows fully participate in the theoretical and technical aspects of clinical and basic science research. Fellows are required to take Statistical Methods for Data Analysis, a graduate level course at Thomas Jefferson University, during the first fellowship year. During this course they learn to apply the principles and techniques of basic statistical analysis to research and are expected to actively conduct research during time away from clinical care responsibilities. The annual didactic sessions include research design, grant writing, research methodology, scientific writing, and presentation skills. The fellows learn how to conduct FPMRS research, work as part of a research team, and develop skills to critically review the research of others. The FPMRS fellow is required to complete and publish one thesis project and write and receive a grant by the end of the fellowship. This thesis should make a meaningful contribution to FPMRS literature. For further support, monthly research meetings are scheduled, in addition to quarterly meetings between the fellow and the faculty advisor with continuous oversight and direction provided by the director of FPMRS research, the research nurse, and the biostatistician.

QI Projects

With the newest policy revision of the ACGME, the fellows are required to describe one learning activity to identify strengths, deficiencies, and limits in their knowledge and expertise (self-reflection and self-assessment). The fellows will also set learning improvement goals and identify and perform appropriate learning activities to achieve self-identified goals. One such goal instituted was to improve the efficiency of our fellow-run clinic. This included all aspects of health care i.e., patient wait times, improving accessibility of clinic resources, patient education, and billing and coding.

International Opportunities

There are several opportunities for international exposure and experience. The entire core faculty in FPMRS, as well as many faculty in the OB/GYN Department and Cooper University Hospital, have extensive global experience. The division of FPMRS believes that in order to develop globally sensitive physicians, it is essential for those in training to participate in health care in other regions of the world. Thus, the division of FPMRS offers the fellows ample opportunity to become active internationally. Such places include, but are not limited to, Jamaica, Ghana, Rwanda, and Vietnam. Additionally, to enhance our fellows’ education in the repair of fistula our division, in conjunction with the International Organization of Women and Development and International Healthcare Volunteers, has the opportunity to send one fellow along with at least one member of the faculty to Ghana in West Africa or Rwanda in East Africa for a period of two weeks during their senior year. The fellows can also develop contacts outside of Cooper and make their own arrangements if desired.
The Jaffe Family Women’s Care Center

The Jaffe Family Women’s Care Center at Cooper University Hospital provides obstetric and gynecologic care for patients with financial burdens. The primary goals of this clinic are to provide services for those who otherwise cannot afford OB/GYN care and to provide education for the residents and fellows. All subspecialty services for obstetrics and gynecology are offered. This is one of few clinics that provides such services for the underserved. The FPRMS clinic is run by the fellow(s) one half-day session a week for three weeks a month with attending supervision. The first week is dedicated to The Jaffe Family Women’s Care Center OR. It is a great opportunity for the fellow to work as a supervisor and clinical instructor. There is always at least one resident assigned to this clinic that evaluates the patients and presents the cases to the fellow and the attending. The fellows are able to make independent clinical decisions and teach residents under faculty supervision.
The Cooper Campus and Surrounding Area

It is extraordinary to have such a high concentration of leadership at one institution, but then, Cooper is an extraordinary health care system.

Cooper University Hospital is the center of a growing health sciences campus that includes the hospital, Cooper Medical School of Rowan University, MD Anderson Cancer Center at Cooper, the internationally acclaimed Coriell Institute for Medical Research, Three Cooper Plaza medical offices, and the Ronald McDonald House. Adjacent to the Cooper Plaza/Lanning Square neighborhood, Cooper has a long history of outreach and service efforts to its local community. Some of these initiatives include health and wellness programs for the neighborhood, development of neighborhood parks and playgrounds, and outreach to programs into local schools.

The hospital’s 312,000-square-foot, 10-story Roberts Pavilion features an expansive lobby and concourse, a restaurant and coffee shop, health resource center, business center, gift shop, and chapel. State-of-the-art patient care facilities include private patient rooms, technologically advanced operating room suites with hybrid imaging capabilities, and an advanced laboratory automation facility. The Emergency Department features 25 beds, dedicated isolation suites, and autonomous CT scanning technology. Designated floors serve specific patient populations including those needing advanced surgical and heart care, along with South Jersey’s only dedicated 30-bed inpatient cancer unit.

Also in the Roberts Pavilion is the 25,000-square-foot Dr. Edward D. Viner Intensive Care Unit—featuring 30 private patient rooms equipped with the latest in advanced technology, and allowing 360-degree patient access. Five patient rooms are capable of negative pressure isolation, and five rooms have chambered isolation alcoves. In addition, an enlarged room with operating room caliber lighting is outfitted to perform bedside exploratory laparotomy in patients too unstable for transport to the operating room.

MD Anderson Cancer Center at Cooper, a four-story, 103,050-square-foot center located on the Cooper Health Sciences Campus in Camden, is dedicated to cancer prevention, detection, treatment, and research. The center includes bright, spacious chemotherapy treatment areas, patient exam rooms, a conference center, and advanced diagnostic and treatment technologies.

The design incorporates an aesthetic approach to healing with abundant natural light, a rooftop Tranquility Garden, an illuminated floor-to-ceiling “Tree of Life” centerpiece, and more than 100 pieces of original art created by 71 New Jersey artists.

Cooper Medical School of Rowan University’s (CMSRU) Medical Education Building is located on the Cooper Health Sciences Campus on South Broadway, between Benson and Washington Streets in Camden. The building, which opened in July 2012, was designed for CMSRU’s curriculum with spaces and technologies to support faculty and students in their educational process.
The Cooper Health Sciences Campus is located in the heart of Camden’s business district. The academic medical center campus is easily accessible by car or public transportation via the commuter high-speed line and bus terminal adjacent to the hospital.

Cooper is a short walk or drive from the exciting Camden waterfront which includes a magnificent waterfront park and marina; the Adventure Aquarium; and the BB&T amphitheater, which hosts nationally renowned entertainment throughout the year. Nearby are the Sixers Training Complex, L3 Communications complex, Lockheed Martin, and Rutgers University Camden Campus and Camden County College. There are expected to be $350M in transportation and infrastructure improvements within the next four to five years to handle the influx of thousands of new employees to the area and students at nearby growing academic campuses.

Cooper is conveniently close to Philadelphia. Just a mile-long drive over the Benjamin Franklin Bridge will put you at the doorstep of Philadelphia’s cultural, culinary, and historic venues. South Jersey also offers a range of living and entertainment options. Quaint towns such as Haddonfield and Collingswood are just 10 minutes away. The lights and action of Atlantic City and popular beach towns such as Cape May and Ocean City are a one-hour drive from Cooper.
How to Apply

The Female Pelvic Medicine and Reconstructive Surgery Fellowship Program at Cooper University Hospital/Cooper Medical School of Rowan University participates in the Electronic Residency Application Service (ERAS) and all information is processed through this system without exception. Information regarding the ERAS application process and timeline is available on the websites listed below.

**Association of American Medical Colleges**
www.aamc.org/eras

**ERAS Fellowship Document Office**
www.erasfellowshipdocuments.org

ERAS applications must contain the following information in order for your application to be considered:

- Common application form
- Curriculum vitae
- Medical school transcript
- Three original letters of recommendation, one of which must be from your current or most recent training director
- Personal statement describing your training goals and future career plans
- ECFMG certification (IMG only)
- USLME reports (1, 2, and 3).

The program director and two additional faculty members will review applicant files. Invitation for interview will be based upon their recommendations.

**Program Eligibility**

Eligibility for the FPMRS Fellowship requires a satisfactory completion of an Obstetrics and Gynecology OR Urology residency approved by the American Council for Graduate Medical Education (ACGME) or the Council of the Royal College of Physicians and Surgeons of Canada (CRCPSC). Individuals accepted for a position in the fellowship program must be a U.S. citizen, a permanent resident, or hold a J-1 visa.

Annual application deadline is April 30.
